

Design handles

Timeless elegance: Inspired by nature

Our claim “Steel is our nature” stands for both filigree precision and sophisticated design – this is reflected in our product portfolio. Our door handles and window handles embody these values and are in perfect harmony with our profile systems made of steel and stainless steel. With their clear, geometric design, they perfectly complement the lines of our steel constructions and give doors and windows a timeless elegance. We therefore combine precision and style and create solutions which reflect our values of long service life, clarity and functionality.

The handles are available in various designs, surfaces and versions to ensure the range of possible applications is as wide as possible. Forster design handles are perfect for use in combination with the narrow profile systems forster presto xs for the indoor area and with forster unico xs for the outer shell – discover our wide variety of door handles!

Your benefits

- Design and functionality in perfect harmony
- Tried-and-tested Forster quality with sustainable and durable materials
- Wide range of surfaces and applications as a perfect combination for forster presto xs and unico xs

Steel is our nature.

For us, steel is a matter of the heart. We develop long-lasting systems for attractive and energy-efficient architecture.

Forster Profile Systems develops and manufactures safe, energy-efficient solutions in steel and stainless steel for doors, windows and facades in Switzerland. Forster works with its own branches in over 20 countries – and exclusive sales partners in around 10 more. In-house consultants are on hand to assist our customers at sites ranging from Europe and the Middle East to Asia and North America. Forster systems are used for building shells and interiors. This includes market-leading solutions that meet

the strictest requirements and standards in terms of thermal insulation, plus safety applications such as fire protection, burglar resistance and bullet resistance. The product range is rounded off by matching accessories. Our customers and business partners in architecture, planning and construction can also count on comprehensive services for their respective industry.
